

## Introduction to Advanced Cataract Planning Tool V8.1

The Advanced Cataract Planning Tool (ACPT) provides a surgeon with important clinical information on one screen to plan the cataract surgery. From this screen, the surgeon can go ahead and make a valid decision on IOL selection for cataract surgery. Some of the benefits of using this tool:

1. Optimize clinical efficiency
2. Patient Safety & Accuracy
3. Pertinent Patient exam information to be viewed quickly
4. Tools to Calculate IOL power
5. Intended Goals for Surgery
6. Warning Flags
7. Audit Trails for Security and Accountability
8. Outcome Analysis if using the IBRA screen (see the IBRA course for more information)

There are two ways to access the Advanced Cataract Planning Tool:

1. Outside of the Exam:
  - a. Access the Clock Screen with the patient in context
  - b. Select the ASC/Surgery drop down | Advanced Cataract Planning Tool | then Summary Sheet Management or by selecting Ctrl + 6 on your keyboard

2. Inside the Exam:
  - a. Access the Clock Screen with the patient in context

In the Exam | select Ctrl+6 on your keyboard to launch "Summary Sheet Management"(Must be logged in with correct surgeon and patient)
